PANLES FOR DISPLAYING, ALERTING, NETWORKING

Many companies (e.g. in the life sciences sector) are required to use monitoring systems in their critical production processes. These systems have to operate with a high degree of data security and record, transfer and save quality-relevant measurement data. Professional suppliers of monitoring systems and validation services offer solutions which are aligned with GAMP 5 for this task. GAMP stands for *Good Automated Manufacturing Practice*. It is a quasi-standard that sets out the requirements for computer-aided systems in a regulated pharmaceuticals environment.

One important task of monitoring processes is to make measurement data available in the locations where local decisions depend on them. halstrup-walcher display panels are the optimum solution for this task:

Installation PUC44 ²⁾

Flush-mounted box for masonry wall installations ³⁾

¹⁾ The parameterisation of the PUC44 takes place via the intuitive touch menu. It can be performed by the commissioner without further training.

²⁾ All PUC series devices have been specifically designed for installation in cleanroom walls and thus have a minimal installation depth. The versions PUC44-2/-3 and PUC24 also feature a hygienic design. A recessed socket is not required for cleanroom installations. It is used for mounting the types PUC44-1 and -2 in brick walls.

³⁾ Recessed area for plastering the flush-mounted box into the wall: 160 mm x 160 mm, 75 mm (width x height, depth)
