

PYRA sense10 LPS10...

SPECTRALLY FLAT CLASS A PYRANOMETER SERIES

INTRODUCTION

PYRA sense is our new family of pyranometers that brings solar global radiation measurement to a higher level!

We produce a full range of pyranometers, all based on the thermopile principle, very precise.

Depending on the model and according to ISO 9060:2018 and WMO (World Meteorological Organization) recommendations, our PYRA sense are all classified as Spectrally Flat Class A, Class B and Class C.

The LPS10... is the top level of the series. It has been designed especially for those applications where the best performance is a must such as:

- Environmental studies
- Research
- Meteorology
- PV monitoring

FEATURES

Internal diagnostic sensors for digital models

To measure temperature, relative humidity, and pressure. You can keep an eye on the operating condition of your pyranometer and predict any maintenance work in advance, thus always ensuring reliable measurements.

Integrated bubble level

To ease horizontal positioning during installation.

Moreover, the pyranometer can be equipped with an optional tilt sensor which allows continuous monitoring of the correct installation.

Protection screen

To resist UV solar radiation.

CONFIGURATION & MEASUREMENT

The sensors

Using the PC application software DATA sense, it is possible to configure the sensor (e.g., Modbus parameters, measuring range for the analog output, etc.), monitor the measurements in real time and save the values detected during the connection in a file.

Passive, analog or RS485 Modbus-RTU isolated output + optional additional analog output

Configurable 0...10 V, 0...5 V, 0...1 V, 4...20 mA or 0...20 mA.

The irradiance range

It is configurable for the analog output.

Calibration report

The pyranometers are supplied factory calibrated according to ISO 9847:2023 (Type A1) standard and with an individual Calibration Report.

SMART TECHNOLOGY

Digital models with Internal diagnostic sensors to keep operating conditions always under control.

EASY TO SET UP & QUICK TO INSTALL

Integrated bubble level and optional tilt sensor to ensure accurate installation in any position.

Configuration and real time data monitoring via software.

ACCURATE & RELIABLE

Supplied factory calibrated with individual Calibration Report. ISO 17025 Calibration Certificate available upon request.

ACCORDING TO THE STANDARD

Spectrally Flat Class A according to ISO 9060. WMO recommendations & IEC 61724-1 requirements fully compliant.

GREAT FLEXIBILITY

Wide variety of outputs choice.
