

# PYRAsense13 LPS13...

## SPECTRALLY FLAT CLASS A PYRANOMETER WITH SHADOW RING

### INTRODUCTION

The LPS13... is built around the LPS10, our Class A Spectrally Flat pyranometer. This family of pyranometers is standard equipped with an adjustable shadow ring that prevents the direct solar radiation to reach the sensor the whole day long, so that **only the diffuse solar radiation** will be measured.

Measuring only diffuse solar radiation provides valuable information about the **atmospheric conditions and overall energy distribution** in a particular location. This data are particularly relevant especially for:

- **gathering information about cloud cover and atmospheric transparency** - crucial for weather forecasting, climate modeling, and understanding regional climate patterns;
- **understanding the proportion of diffuse radiation relative to total solar radiation** for assessing the solar energy potential of a region - essential for planning and optimizing the performance of solar energy systems, such as solar panels and solar thermal collectors;
- **understanding the complex interactions between solar radiation, atmospheric dynamics, and climate processes** - necessary for improving climate models, predicting climate change impacts, and assessing regional climate variability.

### FEATURES

#### Integrated diagnostic for digital models

Internal temperature, relative humidity, and pressure sensors. You can keep an eye on the operating condition of your pyranometer and predict any maintenance work in advance, thus always ensuring reliable measurements.

Built-in **days-of-operation counter** to optimize your maintenance schedule effortlessly, ensuring peak performance.

#### Integrated bubble level in the base of the support

To ease levelling during installation.

Moreover, the pyranometer can be equipped with an optional tilt sensor which allows the position of the complete ring and sensor structure to be monitored over time.

### CONFIGURATION & MEASUREMENT

#### The sensors

Using the PC application software DATAsense, it is possible to configure the sensor (e.g., Modbus parameters, measuring range for the analog output, etc.), monitor the measurements in real time and save the values detected during the connection in a file.

#### Passive, analog or RS485 Modbus-RTU isolated output + optional additional analog output

Configurable 0...10 V, 0...5 V, 0...1 V, 4...20 mA or 0...20 mA.

#### The irradiance range

It is configurable for the analog output.

#### Calibration report

The pyranometers are supplied factory calibrated according to ISO 9847:2023 (Type A1) standard and with an individual Calibration Report.

#### SMART TECHNOLOGY

Digital models with internal diagnostic sensors to keep operating conditions always under control.

Built-in days-of-operation counter.

#### EASY TO SET UP & QUICK TO INSTALL

Integrated bubble level and optional tilt sensor to ensure accurate installation in any position.

Configuration and real time data monitoring via software.

#### ACCURATE & RELIABLE

Supplied factory calibrated with individual Calibration Report. ISO 17025 Calibration Certificate available upon request.

#### ACCORDING TO THE STANDARD

Spectrally Flat Class A according to ISO 9060.

WMO recommendations & IEC 61724-1 requirements fully compliant.

#### GREAT FLEXIBILITY

Wide variety of outputs choice.

## Technical specifications according to ISO 9060:2018

Classification	Spectrally Flat Class A	
Response time (95%)	< 2 s	
Zero offset	a) response to a 200 W/m <sup>2</sup> thermal radiation	<  ±7  W/m <sup>2</sup>
	b) response to a 5 K/h change in ambient temperature	<  ±2  W/m <sup>2</sup>
	a) total zero offset including the effects a), b) and other sources	<  ±10  W/m <sup>2</sup>
Long-term instability (1 year)	<  ±0.5  %	
Non-linearity	<  ±0.2  %	
Directional response (up to 80° with 1000 W/m <sup>2</sup> beam)	<  ±10  W/m <sup>2</sup>	
Spectral error	<  ±0.2  %	
Temperature response (-10...+40°C)	<  ±0.5  %	
Tilt response	<  ±0.2  %	

## Additional measurements in digital models

Internal temperature	range	-40...+80 °C
	resolution	0.1 °C
	accuracy	± 0.5 °C (0...60 °C)
Internal relative humidity	range	0...100 %RH
	resolution	0.1 %RH
	accuracy	± 3 %RH @25 °C (20...80 %RH)
Internal pressure	range	300...1100 hPa
	resolution	0.1 hPa
	accuracy	± 1 hPa (0...60 °C)
Tilt sensor	range	0°...+180°
	resolution	0.1°
	accuracy	< 0.5°

## Ordering codes

LPS13...	M00	Modbus output, without tilt
	M0T	Modbus output, with tilt
	MA0	Modbus + configurable analog output, without tilt
	MAT	Modbus + configurable analog output, with tilt
	OCO	2-wire (current loop) 4...20 mA output
	OPO	mV output

## General specifications

Sensor	Thermopile
Typical sensitivity	6...12 μV/Wm <sup>-2</sup>
Measuring range	-200...4000 W/m <sup>2</sup> The irradiance range for the analog output is 0...2000 W/m <sup>2</sup> by default, and is configurable in LPS13Mxx
Resolution	0.1 W/m <sup>2</sup>
Viewing angle	2π sr
Spectral range (50%)	283...2800 nm
Output	Depending on the model: <ul style="list-style-type: none"> <li>RS485 Modbus-RTU</li> <li>RS485 Modbus-RTU + analog configurable 4...20 mA (default), 0...20 mA, 0...1 V, 0...5 V or 0...10 V</li> <li>2-wire (current loop) 4...20 mA</li> <li>passive in mV</li> </ul>
Power supply	7...30 Vdc for RS485 output 10...30 Vdc for analog output 15...30 Vdc for 0...10 V output
Consumption (digital models)	<i>Modbus output models:</i> 15 mA @ 24 Vdc 21 mA @ 12 Vdc <i>Modbus + analog output models:</i> 37 mA @ 24 Vdc & Iout=22 mA 43 mA @ 12 Vdc & Iout=22 mA
Connection	5-pole M12 8-pole M12 (for LPS13MAx)
Weight	6.8 kg approx.
Operating conditions	-40...+80 °C 0...100 %RH Max. altitude 6000 m
Bubble level accuracy	< 0.2°
Protection degree	IP 67
Materials	Housing: anodized aluminium Screen: ASA Dome: optical glass Ring and stand: aluminum alloy and stainless steel
MTBF	> 10 years
